

**UAP2™ FUELTECH** Premium All Position Retread

*Designed for Truckload, Less-Than-Truckload  
and P&D Applications*

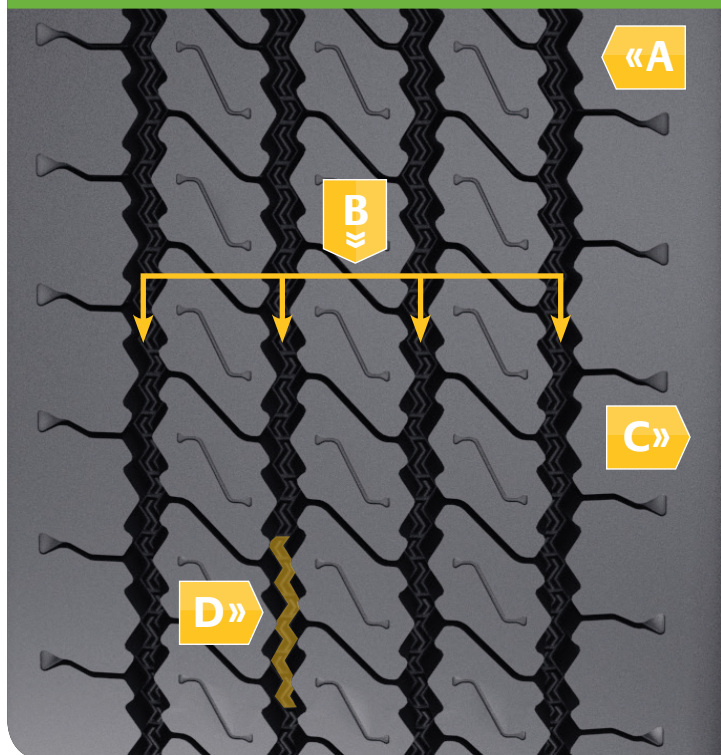

**Long Life ■ Increased Durability ■ SmartWay® Verified**

## **FARTHER THINKING**

Thanks to advances in design and compounding, the Bandag UAP2 FuelTech offers improved performance over our previous generation all-position retread products for tough city and on-highway applications. Design changes and a proprietary compound deliver longer wear life and lower rolling resistance while a unique triangle sipe improves shoulder durability. With the added benefit of SmartWay verification and CARB compliance, the Bandag UAP2 FuelTech retread offers a balance between long tread life and fuel efficiency.

**A** **Proprietary Bandag Compound** .....  
Contributes to long tread life and low rolling resistance.

**B** **Four Circumferential Grooves** .....  
Channels water away, for a strong grip on wet roads.

**C** **Smooth Continuous Shoulders** .....  
Contributes to low rolling resistance.

**D** **Enhanced Stone Rejectors** .....  
Helps protect the belts from casing damage.

..... **Triangle Sipe** .....  
Unique triangle shape with angled groove design improves shoulder durability over previous generation.

**Maximize your casing returns with Bandag.** Bandag retreads represent a total, no-compromise tire solution that delivers strong performance, real cost savings and a proven way to extend the life of your valuable casing assets.
